Dyneema® fibers for marine and industrial applications. Dyneema® SK75 is the multi-purpose grade. This versatile grade is used in most marine applications like ropes, lines, nets and lifting gear. Dyneema® SK62 is an intermediate grade. It has a lower tenacity and is used in netting applications and in rope

An industrial robot is a robot system used for manufacturing.Industrial robots are automated, programmable and capable of movement on three or more axes. Typical applications of robots include welding, painting, assembly, pick and place for printed circuit boards, packaging and labeling, palletizing, product inspection, and testing; all accomplished with high endurance, speed, and precision.

Integrated circuits and reference designs for industrial AC-DC power supply help you design very reliable systems with high full load efficiency, low THD and standby power. Industrial AC-DC designs require: Higher efficiency through soft-switching techniques and fast switching GaN devices Lower THD

The Industrial Revolution was the transition to new manufacturing processes in the period from about 1760 to sometime between 1820 and 1840. This transition included going from hand production methods to machines, new chemical manufacturing and iron production processes, the increasing use of steam power, the development of machine tools and the rise of the factory system.

Microbial cellulases have shown their potential application in various industries including pulp and paper, textile, laundry, biofuel production, food and feed industry, brewing, and agriculture. Due to the complexity of enzyme system and immense industrial potential, cellulases have been a potential candidate for research by both the academic and industrial research groups.

Applied Soft Computing is an international journal promoting an integrated view of soft computing to solve real life problems. Soft computing is a collection of methodologies, which aim to exploit tolerance for imprecision, uncertainty and partial truth to achieve tractability, robustness and low solution cost.
