1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

The availability of detailed environmental data, together with inexpensive and powerful computers, has fueled a rapid increase in predictive modeling of species environmental requirements and geographic distributions.

Maximum entropy modeling of species geographic

Nowadays, one of the major challenges in the wastewater sector is the successful design and reliable operation of treatment processes, which guarantee high treatment efficiencies to comply with effluent quality criteria, while keeping the investment and operating cost as low as possible.

Linear programming (LP, also called linear optimization) is a method to achieve the best outcome (such as maximum profit or lowest cost) in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming (also known as mathematical optimization).. More formally, linear programming is a technique for the ...

0. What is card modeling? 0.1 Scale Modeling in Paper Card Modeling or Paper Modeling is the art of creating scale models with paper. Models are built up from appropriately colored, cut, and folded pieces of paper, usually a stiff cardstock.

Card Modeling FAQ

This is an introduction to R (â€œGNU Sâ€•), a language and environment for statistical computing and graphics. R is similar to the award-winning S system, which was developed at Bell Laboratories by John Chambers et al. It provides a wide variety of statistical and graphical techniques (linear and ...

An Introduction to R

Modeling and simulation (M&S) in simple terms is a substitute for physical experimentation, in which computers are used to compute the results of some physical phenomenon. As it is apparent from its name "Modeling and simulation" firstly a computer is used to build a mathematical model which contains all the parameters of physical model and represent physical model in virtual form then ...

Introduction. Research on dialogue is concerned with the study of how communication takes place through language in conversation. This involves, among other things, investigating what makes a dialogue coherent; how dialogue participants coordinate to take turns in speaking and to achieve mutual understanding; and how knowledge about how dialogue works can be used to design artificial agents ...
