CIGR is an international, non-governmental, non-profit organization providing a networking system for regional and national societies of agricultural engineering as well as private and public companies and individuals all over the world.

CIGR Journal

Strength of materials, also called mechanics of materials, is a subject which deals with the behavior of solid objects subject to stresses and strains. The complete theory began with the consideration of the behavior of one and two dimensional members of structures, whose states of stress can be approximated as two dimensional, and was then generalized to three dimensions to develop a more ...

Strength of materials - Wikipedia

Hydraulic engineering as a sub-discipline of civil engineering is concerned with the flow and conveyance of fluids, principally water and sewage. One feature of these systems is the extensive use of gravity as the motive force to cause the movement of the fluids. This area of civil engineering is intimately related to the design of bridges, dams, channels, canals, and levees, and to both ...

1 Chapter1 HVAC Engineering Fundamentals: Part 1 1.1 Introduction This chapter is devoted to "fundamental" fundamentals "certain principles which lay the foundation for what is to come.

HVAC Engineering Fundamentals: Part 1

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...
