(PDF) The Neuroscience of Spirituality - researchgate.net

The Neuroscience and Religious Cognition Project proposes to identify the alterations in neural systems in patients with Parkinson's Disease (PD) that could account for previously observed reductions in

religiosity and in fluent access to religious concepts.

Neuroscience and Religious Cognition Project - Institute

The neuroscience of religion, also known as neurotheology and as spiritual neuroscience, attempts to explain religious experience and behaviour in neuroscientific terms. It is the study of correlations of neural phenomena with subjective experiences of spirituality and hypotheses to explain these phenomena.

Neuroscience and the Person - BU Personal Websites

Investigations of the neuroscience of religion often logically focus on the limbic system due to the strong association of religion with emotions and emotional memory. "Sacred emotions" describe genuine emotions associated with religious commitment and result from consistent exposure to religious settings.
