

theory of hydraulic models pdf

The Hubbert peak theory says that for any given geographical area, from an individual oil-producing region to the planet as a whole, the rate of petroleum production tends to follow a bell-shaped curve. It is one of the primary theories on peak oil. Choosing a particular curve determines a point of maximum production based on discovery rates, production rates and cumulative production.

Two-dimensional fracture propagation models. The Howard and Fast model was a 2D model. In the following years, other 2D models were published. With a 2D model, the engineer fixes one of the dimensions, normally the fracture height, then calculates the width and length of the fracture.

Telecommunications traffic engineering, teletraffic engineering, or traffic engineering is the application of traffic engineering theory to telecommunications. Teletraffic engineers use their knowledge of statistics including queuing theory, the nature of traffic, their practical models, their measurements and simulations to make predictions and to plan telecommunication networks such as a ...
