historical technology driver for modernism [3] (p. 35). The modernist avant-garde in architecture was indeed particularly well embedded in the machine ethics that accompany fossilism. The appreciation of the possibilities offered by new technologies formed an integral part of the mind-set of the modern building pioneers.

architecture. At the other extreme it is possible to produce a building which consists of little other than structure. The Olympic Stadium in Munich (Fig. i), by the architects Behnisch and Partners with Frei Otto, is an example of this. Between these extremes many different approaches to the relationship between structure and architecture are ...

The fulfillment of the architectural avant-garde would be the total dissolution of Architecture into something outside itself, of aura into mass, of form into process, of author into producer, of architect into organiser.

### **Manfredo Tafuri's theory of the architectural avant-garde**

The Modern Movement is often given the role of the avant-garde in architecture. Recent theoretical developments, however, argue for a differentiation in meaning between `avant-garde`™ and `modernism`™. It is claimed that the avant-garde was a radical and disruptive phenomenon, which aimed at a total unification between art and life and which resisted the divide between high art and mass culture.
